

EQUITOP MYOPLAST®

Equitop Myoplast® is a nutritional supplement designed to maintain muscle function in horses. The vegetable raw material of the product is derived from algae and provides a unique combination on 18 amino acids.

Equitop Myoplast® is formulated as tasty pearl granules to ensure that your horse willingly eats the product and thereby gets the maximum benefit from its important components. The granules are specifically processed to ensure consistent quality of delicate ingredients.

When to use Equitop Myoplast®?

- For young horses during training
- For seasonal training (e.g. Racehorses and Event Horses)
- For breeding stock
- For old horses to cover the increased need for valuable proteins

To determine the success of feeding Equitop Myoplast® you should look especially for an improvement of the following conditions and qualities in your horse. Submission, suppleness, lightness and ease of movements, general willingness to perform, stamina, muscles (especially in the neck, back, loin and hind legs) as well as overall condition.

Important information:

You can safely give Equitop Myoplast® to your horse before or during a competition. It does not contain any doping relevant substances.

Composition:

Algae powder (40.2%), saccharose (37.3%), glucose syrup (14.1%) and corn starch (8%)
