

# Monzaldon™

## Presentation

Clear, sterile injectable solution. Each ml contains 100 mg vetrabutine hydrochloride and 5mg phenol Ph. Eur (as preservative).

## Uses

A specific uterine relaxant and musculotropic stimulator for sows and bitches only. Monzaldon dilates the soft birth canal and co-ordinates uterine contractions to ease and shorten parturition. Monzaldon may be useful in cases of dystocia where there is insufficient relaxation of the birth canal.

## Dosage and administration

A single intramuscular injection. In bitches the dose can be repeated at 30–60 minute intervals for up to 3 times.

Sows	2–4 ml, i.e. approximately 2.0 mg/kg bwt
Bitches	0.25–1 ml, i.e. approximately 2.0 mg/kg bwt

## WITHDRAWAL PERIOD START

### Withdrawal Period Information - PLEASE DO NOT REMOVE

<i>Include in WP Book (yes/no)</i>	<i>Changed since last WP Book (yes/no)</i>	<i>Cattle Milk</i>	<i>Cattle Meat</i>	<i>Sheep Meat</i>	<i>Pig Meat</i>	<i>Poultry Meat</i>	<i>Poultry Eggs</i>	<i>Fish Meat</i>	<i>Notes</i>

## WITHDRAWAL PERIOD END

## Contra-indications, warnings, etc

Not recommended by intravenous route.

### Withdrawal period

Animals must not be slaughtered for human consumption during treatment.

Pigs may be slaughtered for human consumption only after 28 days from the last treatment.

### User safety

Pregnant women and women of child-bearing age should exercise great care when administering the product to avoid the danger of accidental self inoculation.

If accidental self injection occurs, seek medical advice and show a copy of the label/data sheet to the doctor.

Dispose of unused product safely.

For animal treatment only.

Keep out of the reach of children.

## Pharmaceutical precautions

Store below 25°C. Following withdrawal of the first dose, use the product within 28 days. Discard unused material. Avoid the introduction of contamination during use. Should any apparent growth or discolouration occur, the product should be discarded.
